

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, AUGUST 10, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Sixteen new large fires were reported, eight in the Northwest, four in Northern California, and two each in Eastern Great Basin and Western Great Basin Areas. Five large fires reached containment, two in the Northwest, and one each in Northern Rockies, Eastern Great Basin and Western Great Basin Areas. Moderate to high initial attack activity was reported in the Northwest, Northern California, Eastern Great Basin and Western Great Basin. Very high to extreme fire indices were reported in California, Idaho, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

NORTHERN CALIFORNIA AREA LARGE FIRE:

TROUGH, Mendocino National Forest. A Type 2 Incident Management Team (Carlson) is assigned. A Type 1 Incident Management Team (Studebaker) is on order and will transition to the fire this morning. This fire is four miles west of Stoneyford, CA. The fire made significant runs during the burning period. Power poles were lost on a power line to St. John Mountain which is a major communication site for portions of northern California. The fire is now burning within the boundaries of the Snow Mountain Wilderness and continues to threaten structures to the west, south and east. BLUE, Modoc National Forest. A Type 1 Incident Management Team (Gage) is assigned. This fire is 28 miles south of Alturas, CA. No further information was received.

MODOC COMPLEX, Modoc National Forest. A Type 2 Incident Management Team (Bright) is assigned. This complex of fires is near Canby, CA and includes the Deer fire plus two others. High temperatures and low relative humidity are hampering containment efforts.

SHAFFER, Northern California District, BLM. This fire is near Linchfield, CA. No further information was received.

COWHEAD, Northern California District, BLM. This fire is six miles east of Fort Bidwell, CA. No further information was received.

NORTHWEST AREA LARGE FIRES:

LAKEVIEW COMPLEX, Fremont National Forest. A Type 1 Incident Management Team (Stutler) is assigned. This complex of fires is in the Lakeview, OR area. The complex consists of the Johnson Creek and South Warner fires. This complex will also have initial attack responsibility for part of the forest.

JACKIE'S BUTTE, Vale District, BLM. A Type 2 Incident Management Team (Jackson) has been ordered. This lightning caused fire, burning in grass and sagebrush, is ten miles east of Rome, OR. High temperatures, shifting winds and difficult terrain are hindering containment efforts. The community of Rome, OR is threatened.

CHRISTMAS TREE, Lakeview District, BLM. This fire is four miles northeast of Paisley, OR. No further information was received.

WEST CRATER, Vale District, BLM. This lightning caused fire is ten miles northwest of Rome, OR and is threatening several local ranches. High winds and tornado warnings contributed to containment difficulties.

SHEEPSHEAD, Burns District, BLM. This fire is 75 miles southeast of Burns, OR. The fire is burning in an old burn with continuous fuels. Poor access, passing thunderstorms, gusty winds and multiple new fires are impeding containment efforts.

IRON MOUNTAIN, Burns District, BLM. This fire is 22 miles southwest of Burns, OR. Crews made good progress with containment efforts. Continuous flashy fuels and gusty winds associated with passing thunderstorms are hampering containment efforts.

JUMP, Lakeview District, BLM. This fire is four miles northeast of Paisley, OR. No further information was received.

JORDAN CREEK, Vale District, BLM. This lightning caused fire is three miles northwest of Rome, OR. High winds and low relative humidity are impeding containment efforts.

IRON MOUNTAIN, Vale District, BLM. This lightning caused fire is seven miles northwest of Rome, OR. Observed fire behavior was running.

NORTHERN ROCKIES AREA LARGE FIRES:

ARTHUR, Yellowstone National Park. A Type 1 Incident Management Team (Frye) is assigned. This fire is 55 miles west of Cody, WY. The East Entrance road remains closed at the Yellowstone National Park boundary, with the exception of scheduled piloted traffic. Light rain and heavy cloud cover assisted crews with fireline construction and mopup.

TACO, Nez Perce National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is ten miles east of Riggins, ID. Burnout operations were successful along the bottom and southern half of the west perimeter. Air operations were limited due to an inversion in the late afternoon.

GNF = Gallatin National Forest

WESTERN GREAT BASIN AREA LARGE FIRES:

FISH, Carson City Field Office, BLM. A Type 2 Incident Management Team (Terwilliger) has been ordered and will assume command this morning. This fire is ten miles northeast of Doyle, CA. Extreme fire behavior, rapid rates of spread and low fuel moisture were observed. Numerous structures and ranch houses are threatened, along with a major power transmission line that transports power between the Pacific Northwest and Reno, NV.

PLEASANT VALLEY COMPLEX, Carson City Field Office, BLM. A Type 2 Incident Management Team (Conrad) is assigned. This complex of four fires is eight miles southeast of Reno, NV. Air tankers assisted in holding flare-ups when gusty winds caused the fire to make runs towards structures. Active fire behavior, spotting, and rapid rates of spread were observed. Crews continue to build and reinforce fireline.

MURPHY, Humboldt-Toiyabe National Forest. This lightning caused fire is 16 miles east of Mountain City, NV. A thunderstorm over the fire with sustained winds of 30 to 35 mph caused rapid growth.

ANTELOPE, Carson City Field Office, BLM. This fire is eight miles northwest of Reno, NV. Fire activity has moderated with some torching of individual trees occurring within the perimeter. Crews continue to work on containment lines and mopup.

RODEO CREEK, Northern Region, Nevada Division of Forestry. This fire is 21

miles northwest of Carlin, NV. Crews were able to make good progress on fireline construction and mopup.

EASTERN GREAT BASIN LARGE FIRES:

RED, Utah County. This fire is eight miles southeast of Spanish Fork, UT. No new information was received.

FALCON, Bridger-Teton National Forest. This fire is located in the Teton Wilderness, 48 miles northeast of Jackson, WY. Due to the remoteness of the fire, safety and logistical concerns, a confinement strategy was implemented to keep the fire west of Falcon Creek and to hold any spread to the south.

ANTELOPE CANYON, Salt Lake Field Office. This fire is 40 miles southwest of Tooele, UT. Air tankers were successful in slowing the fire spread.

ROCKY MOUNTAIN AREA LARGE FIRES:

MAD CREEK, Routt National Forest. A Type 2 Incident Management Team (Cook) is assigned. This fire is in the Mount Zirkel Wilderness Area, 11 miles north of Steamboat Springs, CO. This fire is being managed under a confinement suppression strategy. Significant precipitation was received which moderated fire activity.

SOUTHERN AREA LARGE FIRES:

COBB CREEK, Oklahoma Division of Forestry. This fire is four miles northeast of Fort Cobb, OK. No new information was reported. This will be the last report unless new information is received.

HILLARD ROAD, West Texas Counties. This fire, burning in cedar, oak and juniper, is 20 miles southwest of Austin, TX. No new information was received.

RANGER WEST, West Texas Counties. This fire, burning in heavy mesquite, cedar and oak, is 40 miles east of Abilene, TX. No new information was received.

OUTLOOK:

High pressure over northern California will continue to bring mostly clear conditions with partly cloudy skies over the mountains in the afternoon. High temperatures will be in the upper 80's to 105 inland. Minimum relative humidity will range from 14 to 22 percent inland. Winds will be light and variable with normal upslope and up canyon winds in the afternoon at 8 to 15 mph.

Strong high pressure will continue over the Pacific Northwest with a southerly flow allowing moisture to drift into south-central and southeast Oregon resulting in the threat of thunderstorms. High temperatures will be in the 80 to mid 90's, except near 100 in the southwest Oregon interior and Columbia Basin. Minimum relative humidity will range from 20 to 35 percent and into the single digits in northeast Washington. Winds will be southwest to northwest at 5 to 15 mph, with gusts east of the Cascades up to 25 mph.

A southwest flow over the Northern Rockies will bring a slim threat of dry thunderstorms to southwest Montana. High temperatures will be in the upper 70's to lower 90's, with minimum relative humidity ranging from 15 to 30 percent. Winds will be northeast to southeast at 5 to 15 mph with gusts up to 25 mph.

Subtropical moisture moving around a strong ridge of high pressure will bring partly cloudy conditions with isolated afternoon and early evening thunderstorms over Nevada. High temperatures will in the 90's, and 100 to

110 south. Minimum relative humidity will range from 10 to 22 percent. Winds will be westerly at 5 to 15 mph, and south at 5 to 15 mph in southern portions of the state.

Residual monsoonal moisture and instability will result in isolated wet showers and thunderstorms through Utah, and extending north into southern Idaho with isolated dry thunderstorms. High temperatures will be in the 70's and 80's in the mountains, and 90 to 105 at lower elevations. Minimum relative humidity will range from 5 to 15 percent, and 20 to 30 percent in the mountains. Winds will be west to northwest at 10 to 20 mph across Idaho, and variable at 5 to 15 mph in Utah.
